- A. Total number of fire fatalities in domestic premises for each of the fiscal years from 2019 until 2024, split into risk groups, specifying which groups, eg. Hoarding behaviours; inappropriate smoking; people under the influence of alcohol; people who used emollient creams; people who lived alone; ex military. Please provide your response broken down by year.
- B. For each of the years from 2019 until 2024, for the 31st March in each year. Please provide the number of properties / premises in your area with a Clutter Image Rating (CIR) of 6 or above.

2 Reply

The following information is taken from Tyne and Wear Fire and Rescue Service (TWFRS) Incident Recording System (IRS). An IRS incident record is completed by the Officer in Charge for every incident attended.

Unfortunately we do not store clutter image ratings (CIR) or victim details such as if they ex military data in our system. We also do not have a designated field in our database if emollient cream was used, this may get used in the incident commentary free text box.

3 Results

There was a total of **26** incidents between 1st March 2019 to 31st March 2024 which involved one or more fire fatalities in a domestic premise.
